1. NEW RANGE ROVER

INTRODUCTION

Over the last five decades, Range Rover has led by example. An evolutionary approach to design has cemented a visual silhouette that is instantly recognizable across the globe. A globe that the Range Rover has been able to traverse, literally, by providing supreme breadth of capability. Combining these elements, strong visual with powerful capability, in a truly elegant and sophisticated design, has proven to be a winning combination appreciated by loyal following of customers the world over.

The fifth-generation Range Rover takes the Land Rover brand's modernist design philosophy to the next level, with a contemporary interpretation of its trademark profile to create an incredible design statement. It continues to lead the SUV world, bringing breathtaking modernity, aesthetic grace and sophistication to the latest flagship.

"The New Range Rover is a superb manifestation of our vision to create the world's most desirable luxury vehicles, for the most discerning of customers. It writes the next chapter in the unique story of pioneering innovation that has been a Range Rover hallmark for more than 50 years."

- Thierry Bolloré, Chief Executive Officer, Jaguar Land Rover

HIGHLIGHTS

A host of new innovative technologies, features and options combine with elevated attention to design, detail and material choices to help solidify Range Rovers position at the pinnacle of the global SUV marketplace.

- **New Three Row Seating:** The New Range Rover will be offered as a 5-seat vehicle in both short wheelbase (SWB) and long wheelbase (LWB). Additionally, for the first time ever, the LWB will also be available as a three-row vehicle that provides 1st Class seating for up to seven adults.
- **Composure and Capability:** Dynamic Response Pro provides supreme ride comfort utilizing eHorizon data to read the road ahead and prime the suspension to provide appropriate responses.
- **Manueverability:** Standard All-Wheel Steering combines superior high-speed stability with exceptional maneuverability at low speeds – delivering a turning circle of only 36 feet (similar to MINI Cooper)
- **Performance:** New 523HP Twin Turbo V8 delivers 0-60mph in as little as 4.4s thanks to an extra 92lb-ft of torque and a Dynamic Launch mode.
- **Calm Sanctuary:** The quietest Range Rover cabin ever combines with next-generation noise-cancelling headrest speakers to create ultimate cabin quiet and refinement.
- **Sense of Occasion:** The Tailgate Event Suite reinforces the notion that every trip in this vehicle is an experience, with the potential to create lasting memories with family and friends.
- **Technology:** Loaded with the most relevant technological innovations in the industry.
 - Pivi Pro is always connected and is paired with a larger 13.1" touch screen
 - First Land Rover to introduce Wireless Apple CarPlay and Android Auto
 - Transformational SiriusXM 360L debuts on the New Range Rover, offering an extensively personalized radio experience.
 - Built-in Amazon Alexa minimizes distractions by connecting to your account and recognizing intuitive verbal commands for music, navigation, traffic, smart home devices and more.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

New Offer Structure and Pricing

- At launch, the New Range Rover will be available with two powertrain options (P400 and P530)
- Available models will include the SE, Autobiography (ATB) and First Edition.
- LWB will be available with a third row that delivers comfort for up to seven adults.
- First Edition will be available throughout the first year of production. It is based on the Autobiography and features a unique specification.
- Pricing for the New Range Rover represents a very strong value when considering all of the advancements in design, refinement, capability, performance, technology and feature that have been included in all models

L460 Variant	SE P400	SE P530	ATB	1 st Edition	ATB	1 st Edition	SE P400	SE P530	ATB
	SWB				LWB		LWB 7 Seat		
MSRP	104,000	118,700	152,000	158,200	156,000	163,500	110,000	124,700	154,000

- For example, SE will take the place of the volume HSE model from the previous generation with an even higher level of standard equipment as shown below:

Additional Equipment Included: New Range Rover SE variants vs prior model HSE	
All Wheel Steering	13.1" Touchscreen
Dynamic Response Pro	Pivi Pro (Connected)
Electronic Active Differential with Torque Vectoring by Braking	Adaptive Cruise Control with Steering Assist
21" Silver wheel – P400	Surround Camera
21" Diamond Turned w/Gloss Dark Grey contrast – P530	Blind Spot Assist
All Terrain Progress Control (ATPC)	Rear Traffic Monitor
Terrain Response 2	Auto High Beam Assist (AHBA)
Powered gesture tailgate/boot lid	Wi-Fi Enabled with Data Plan
Front fog lights	Wireless device charging with phone signal booster
Laminated front and toughened rear side glass (7 Seat Models)	20-way heated electric front seats with power recline heated rear seats
Extended Leather Upgrade	Heated third row (7 Seat Models)
Duo Tone Ebony/Perlino Morzine headlining	
Natural Brown Walnut veneer	

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

EXTERIOR DESIGN

The New Range Rover is defined by three lines that can trace their origins back through the generations:

1. Falling roofline
2. Strong waistline
3. Rising sill line

These trademark features combine with a characteristically short front overhang and a distinctive new boat tail rear to create an elegant profile that conveys the unrivaled presence of the Range Rover

The unbroken waistline showcases the Land Rover brand's attention to detail as the rounded edge of the door now meets the glass in a simple finish thanks to a specially engineered hidden waist finisher. The design-enabling technology combines with flush glazing, hidden-until-lit lighting and precise detailing to create the impression that the vehicle has been milled from a single, solid piece of metal. Additional design details that are characteristic of Range Rover include the Clamshell Hood, Floating Roof, and Split tailgate.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Rear Design is newly defined by an uninterrupted edge that encapsulates the whole rear tailgate section. This helps to accentuate the strong, masterfully sculpted body side section.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

LED **tail lamps** continue with a vertically oriented design, but benefit from new technology that allows for an even more sleek design that remains hidden until lit.

Jewel like design of the headlamps, appears as if cut from pieces of glass, including a new execution of the signature daytime running lamp

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Trim accents toward the front and rear sides of the New Range Rover create a subtle visual impact. These elements also change color and material, depending on the trim selected. Trim elements include: Grill tips, Door Gill Surround, Tailgate Finisher, Bumper Grill Blades, Tow Eye Cover, Rear Side Ingot, as well as Hood and Tailgate Lettering.

- **Autobiography Exterior Pack** standard on Autobiography and First Edition features Atlas trim elements.

- **The Rear Ingot** is introduced as a new design element. Its color and material are dependent on the exterior pack chosen. The Autobiography is displayed here.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

- Nickel Atlas Exterior Pack showcasing Nickel Atlas trim elements standard on SE

- Shadow Exterior Pack optional on all models offers a sleek Graphite Atlas finish.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

INTERIOR DESIGN

The luxurious interior is underpinned by modern, intuitive and relevant technologies. Designed to work harmoniously with the finest materials and wellbeing innovations to create a calm sanctuary for all occupants. Every trip will be an experience to savor.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

A new Shifter and Open Pore Wood Veneers offer a premium tactile feel, accompanied by a streamlined instrument cluster and reductive design of the center console.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Third Row Seating now offers 1st class seats for up to 7 adults

- Third row is executed to full level of luxury and material quality expected of any Range Rover
- Offers 34 inches of legroom and a 25 degree backrest angle for exceptional comfort
- Heated 3rd row seats with USB-C power ports
- Full power operation of the 2nd and 3rd row seats
- Power 2nd row window sunblinds
- 4-zone climate control with personal vents for each 3rd row seat.
- Stadium seats provide a 1.6" rise over the front seats to allow for excellent visibility and openness.
- Slide and tip 2nd row provides excellent space to access the 3rd row seats

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Executive Class Rear Seating. First class travel with 3+ feet of legroom in LWB .

- Available on all 5 seat variants. New Range Rover executive seating offers 1.7+ inches additional leg room.
- Std on ATB and Above to includes Hot Stone Massage, Rear Seat Entertainment, Power-Fold Armrest.
- Comfort Plus (std on First Edition) includes heated heel catcher, calf rest, center rest and door armrest.

Sumptuous **Semi-Aniline** is available on all New Range Rovers. Standard on Autobiography and above. **Near-Aniline Leather** available exclusively on Autobiography

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

11.4" Rear Entertainment Touch Screens standard on Autobiography and First Edition. Optional on SE.

- High definition touch screens, allow individual media management of each screen
- Can also be controlled via a smart phone or the 8" touch screen controller in the center armrest
- Each screen has its own HDMI input, which can also support consumer device dongles such as Chromecast
- Two 60w USB-C ports are equipped for powering your streaming devices while in use

New 8" Rear Seat Touch Screen Controller included with executive seating, offers the ability to control climate, lighting and infotainment for each individual rear seat

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

New Tailgate Event Suite offers an elevated experience wherever and whenever the occasion should arise. Comes complete with additional speakers, lighting and leather cushions.

Versatile Loadspace Floor adds new levels of convenience by changing storage configurations and creating the tailgate seating.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

TECHNOLOGY

Pivi's 13.1-inch curved, floating screen debuts for the first time on a Land Rover.

- The design embodies the architectural lightness of the interior with a minimalist frame design.
- Now includes haptic feedback, which adds tactile response to the screen. When a screen input is made, the screen responds with a “click” sensation indicating it has registered the touch input

The elegant, new semi-floating 13.7-inch Interactive Driver Display brings high-definition graphic, which are based around a three-panel layout that intuitively reflects the Pivi homescreen

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Active Noise Cancellation (included in with the Meridian Signature Sound System) monitors wheel vibrations, tire noise and engine sounds that are transmitted into the cabin.

- Generates a cancelling signal, which is played through the system's 35 speakers.
- Includes two 2.4" speakers in each of the four main headrests, creating personal quiet zones similar to the effect of using high-end noise-cancelling headphones.

SiriusXM 360L - the most extensive and personalized radio experience on the road.

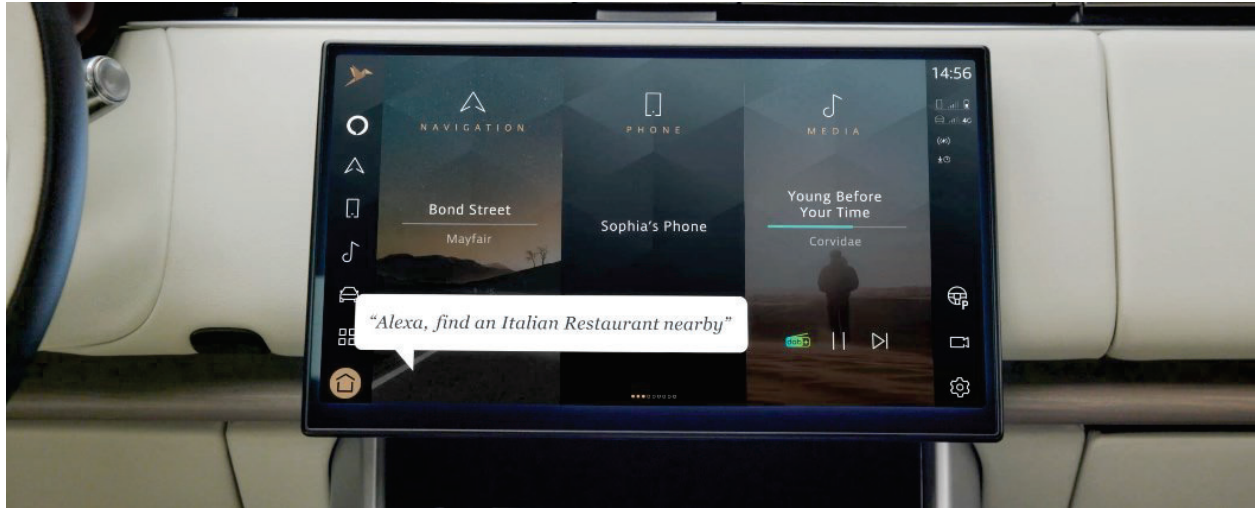

- SiriusXM's latest advanced in-car technology that combines satellite and cellular signals
- Provides an extended range of channels, shows and hosts, with personalization features to make discovering your perfect soundtrack easier than ever before.
- User will enjoy an unmatched variety of ad-free music, plus sports, news and talk
- On demand content, podcasts, ad-free personalized Pandora stations and curated recommendations

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

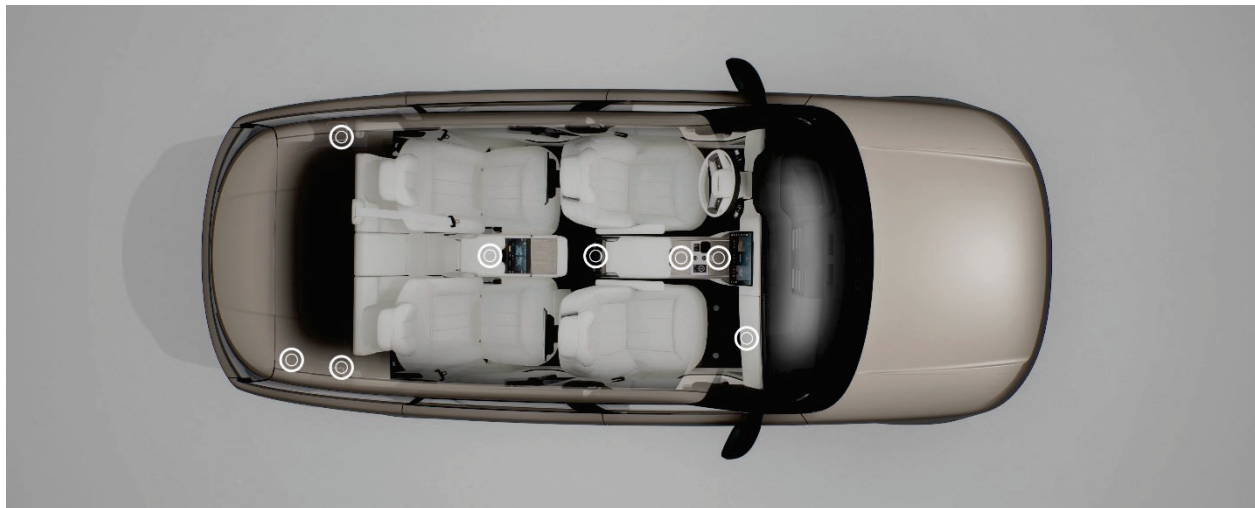

Ask Alexa provides effortless modern luxury.

- Use intuitive voice commands to go beyond touchscreen and button interfaces – this is the next generation of cockpit command featuring Alexa's voice Artificial Intelligence
- Integrated seamlessly with Pivi Pro, allows you to simply ask Alexa as you would at home, with relevant results directly feeding your navigation, audio or other functions

Seamless Connectivity allows any seat to connect a device.

- Up to 14 power and data points in 8 locations.
- Up to 8 USB-C points, plus 120-volt and 12-volt power
- Row 2 offers USB-C connections with a 60W rating that is sufficient to charge a laptop
- WiFi Hotspot allows up to 8 devices to connect simultaneously

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Cabin Air Purification Pro protects its occupants by purifying the air inside of the cabin.

- Targets odours, bacteria and allergens using the latest Nano E-X Technology
- Uses 10x the active ions in the existing system.

Software Over the Air keeps the New Range Rover always up-to-date.

- Over 70 modules can receive direct over-the-air updates
- Covers all major control systems, navigation and infotainment for a hassle free experience
- Always connected to ensure updates are provided the moment that they become available, OR
- Schedule updates to happen at your convenience

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

ARCHITECTURE & POWERTRAIN

Body structure

New Modular Longitudinal Architecture, MLA-Flex, underpins every aspect of this luxury SUV, from its incredible capability and agile handling to its peerless refinement.

- Sophisticated mixed metal architecture delivers new levels of stiffness and noise isolation
- Torsional stiffness increases by 50% over the current Range Rover
- Body strength and stiffness helps reduce structure borne noise by 24%
- Precision Laser Welded **roof joint** to tolerances of just fractions of an inch
- Doors are stamped from single pieces of aluminium.

Aerodynamics Improved by 12% through a relentless attention to detail that has created surfaces for optimum air flow.

- Side glass and pillars are flush-fitting
- Eliminated waist finisher
- Flush door handles
- Tighter shut lines
- Underfloor aero shields

All combine in perfect synergy to deliver a Cd of 0.30.

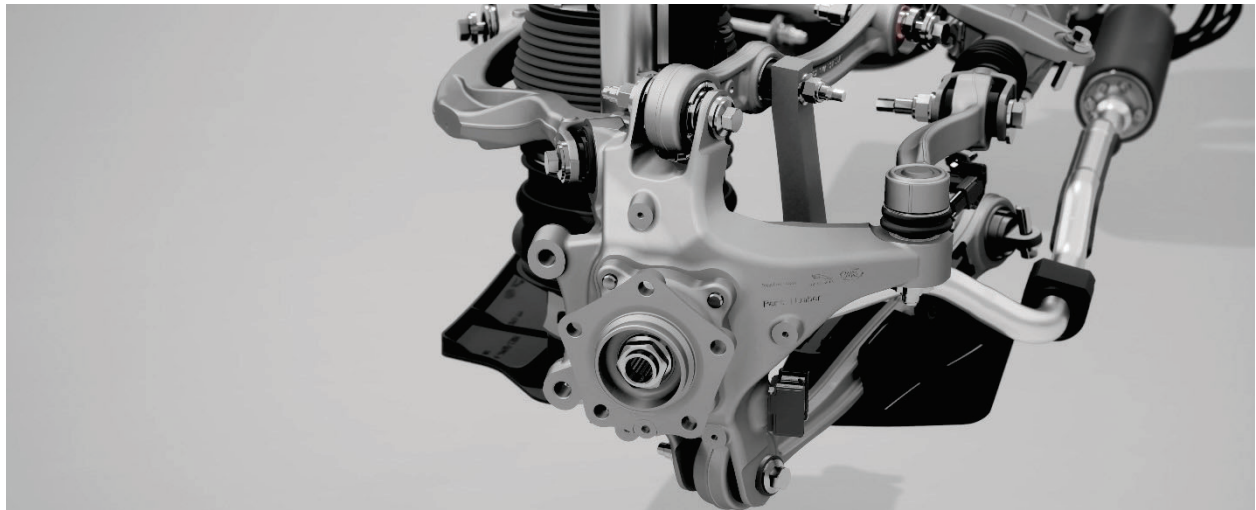

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Suspension, Steering, AWD and Driving Dynamics

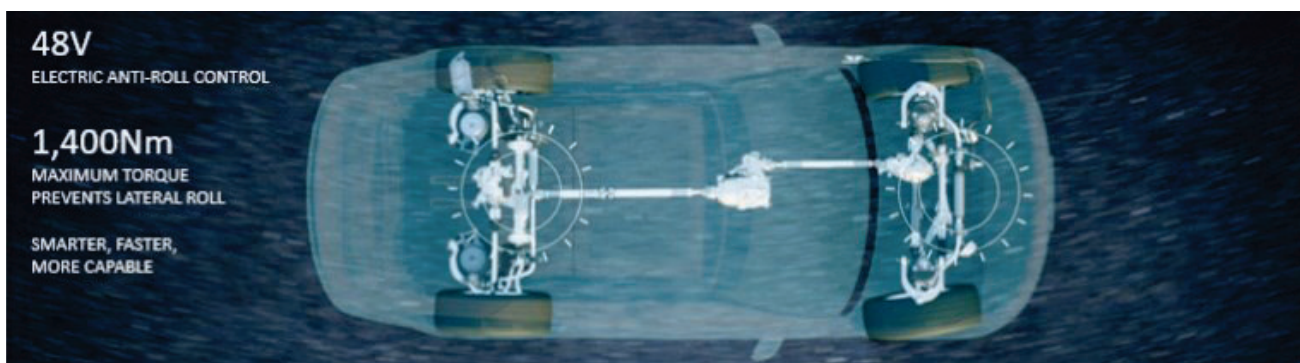

The New Range Rovers suspension system smoothes any road surface, absorbing imperfections and providing connected responses to the driver. It is agile at low speeds, confident and progressive in cornering, and stable at high speeds. Enabling this is a combination of new hardware, uniquely integrated with the latest in dynamics technologies and control systems to deliver the ultimate balance of luxurious ride quality and precise dynamic response.

Range Rover's first five-link rear axle. This new hardware is enabled by the new MLA architecture, allowing finer adjustments to reach the optimum combination of ride quality and dynamic response.

Dynamic Response Pro is available as standard on a Land Rover for the first time. It's smarter, faster and more capable than the hydraulic Dynamic Response system used on V8 variants of the current Range Rover.

- Operates using electrical actuators
- 48-volt system includes a torque sensor, gearbox and motor on each axle
- Rapidly delivers torque to prevent lateral roll – 50% more capable than any other system
- Ensures composure at all times by continually optimising the forces on front and rear stabilizer bars by generating 650+ lb-ft of torque within 200 milliseconds.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

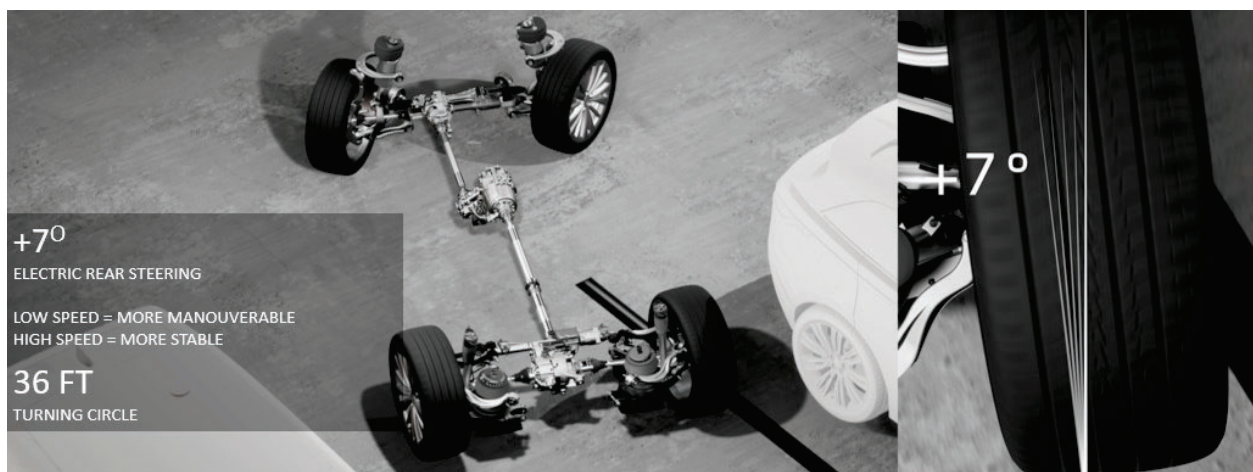

Intelligent All-Wheel Drive is simply more capable than ever. It's always monitoring terrain, speed and traction conditions and continuously adapting to provide seamless progress. In addition:

- Torque on Demand precisely delivers torque to individual wheels, to maximise traction.
- Has the added ability to disconnect the front axle while on the move, improving dynamic agility, while avoiding the weight and drag losses of traditional systems.
- Intelligent All-Wheel Drive reconnects seamlessly and automatically, in the blink of an eye, should you need additional traction.
- In all off-road modes, all-wheel drive is always connected.

All-Wheel Steer is now standard on all New Range Rover Models. This steering system automatically turns the rear wheels at angles up to 7 degrees

- Improves agility and stability to deliver a greater sense of calm, relaxed progress
- In low-speed turns, the rear wheels move in the opposite direction to the front, generating the turning circle of 36ft, which is 2ft less than the Range Rover Evoque.
- At higher speeds, the rear wheels move in phase with the front wheels, enhancing responsiveness and stability through lane changes and cornering.
- Driver experiences faster, more intuitive response to inputs
- Passengers experience smoother, more progressive and natural changes in direction

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

Twin-valve Bilstein mono-tube dampers are simply the best available on the market.

- Allowing for a broader scope of tuning – for example, a greater step change in Dynamic Mode responses
- Independently adjustable rebound and compression damping for a more consistently and composed ride
- Rebound and compression adjustability also prove hugely beneficial in offroad driving situations where terrain variability is high

Breadth of Capability. In a Class of its own with an exceptional level of off-road capability. Using the best of our advanced all-terrain technology, first seen on the New Defender, the New Range Rover has been engineered to deliver effortless progress, over any terrain.

- Approach and departure angles provide significant off-road capability, even at the default ground clearance of 11.6”.
- Ability to address gradients of up to 45-degrees, traverse on sand, snow or mud,
- Wade through almost 3 feet of water (35.4”).
- The same advanced chassis technologies deployed in the New Range Rover to deliver smooth on-road comfort, also delivers control and composure over broken surfaces and rough terrain:
 - Five-link rear axle helps provide class-leading wheel articulation with a total range of 20”
 - All-wheel steering enhances off-road progress, assisting steering out of ruts, or maintaining a straight line on softer surfaces.
 - Electronic air suspension has four stages of elevation delivering a maximum rise of 5.7 inches over standard.

Changes in standard equipment, options or prices can occur. Land Rover reserves the right to change product specifications at any time without incurring any obligations.

The Optional **Configurable Programs**, standard on Autobiography and above, includes Configurable Dynamic Mode and Terrain Response 2 (TR2).

- TR2 which includes six pre-set off road modes, assesses changes in surface and adapts damping, throttle, suspension and steering response – automatically, instantaneously and seamlessly.
- Configurable dynamic mode offers choice between “normal” and “dynamic” set up. Dynamic includes customizable Engine, Steering, Gear Shift and Suspension settings.

Powertrain

New 523HP Twin Turbo V8 delivers trademark Range Rover drive. Dynamic Launch enables 0-60mph in just 4.4 seconds, which is aided by an extra 100 lb-ft of torque over the outgoing V8.

- Compared to similar V8 designs, this engine has been specially developed to suit Land Rover's demanding requirements
 - A specially designed sump ensures the New Range Rover V8 can cope with 45 degrees of articulation in extreme off-road driving.
 - Unique air intake delivers a maximum wading depth of 35.4" / 900mm.
 - Strengthening ribs are added to ensure the new V8 passes Land Rover's kerb strike durability tests
 - A powerful starter motor meets Land Rover's cold-start requirements.
- Two parallel twin-scroll turbos ensure maximum power while minimising turbo lag with one turbo per cylinder bank.
- Valvetronic & double VANOS valve actuation deliver 13% efficiency with precise fuel injection timing
- Proven components such as a forged crankshaft, hollow camshafts and "Hot-Vee" turbochargers contribute to the longevity of the engine.

New 434HP plug-in hybrid arriving for 2023 Model Year, delivers a hushed EV performance that is now enhanced through the use of an in-line 6-cylinder engine. Other Key highlights of the new PHEV include:

- Targeting a certified electric range of TBA
- Capable of all electric drive up to 87 MPH
- 405 lb-ft of torque and targeted 0-60 time of 5.8 seconds
- Can be operated Hybrid, EV and Save modes depending on your journey.
- Predictive Energy Optimisation (PEO) function intelligently integrates route and GPS location data to maximize efficiency for the selected journey.

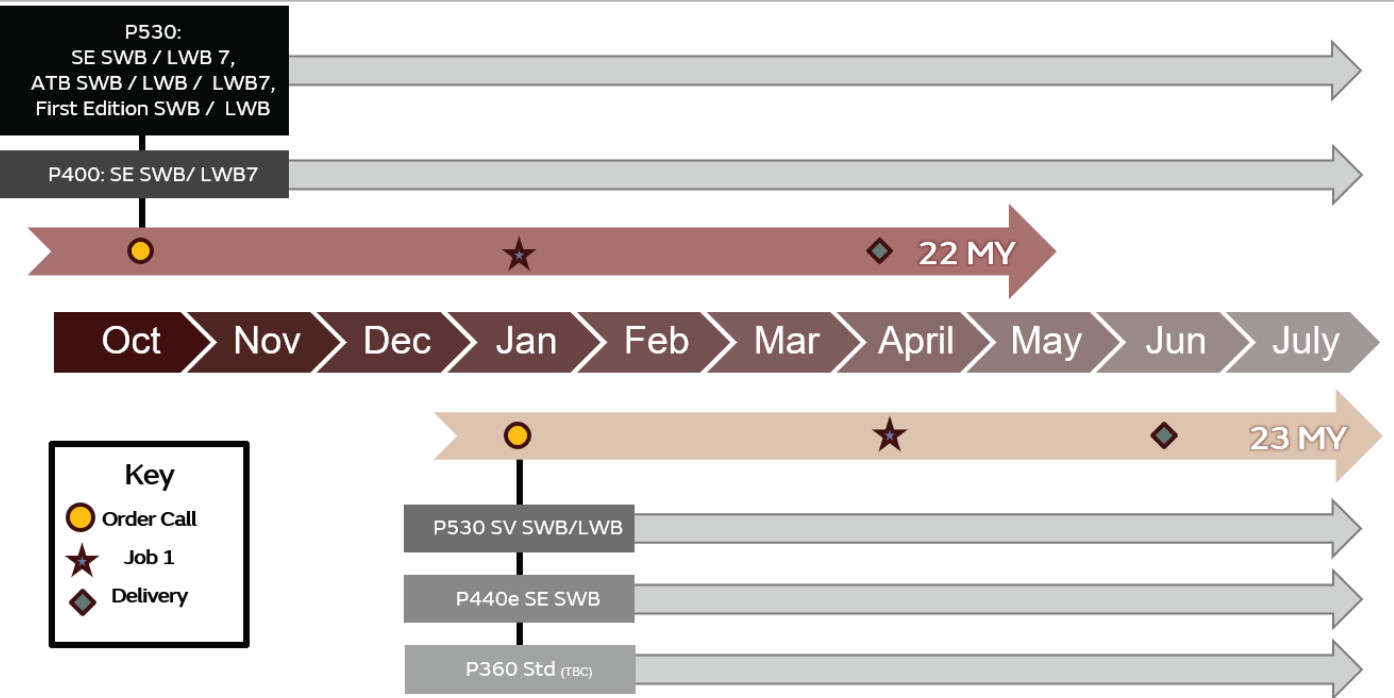

38.2 KWH Battery
105KW E-Motor
50KW DC Charging
